

USE ON

CONCRETE
BRICK
BLOCK
STONE

DO NOT USE ON
PAINTED SURFACES

GRAFFITI GONE! B

**Removes Spray Paint, Ink
and Crayon from Rough
Unpainted Surfaces.**

EASY TO USE

WATER BASED
EFFECTIVE
BIODEGRADABLE
"GHOST" REMOVER
RINSES EASILY
NO HARSH SOLVENTS

Shake well before use. Apply with solvent resistant roller, brush or low pressure sprayer. Lay down a smooth uniform coating. Agitate coating after a few minutes with soft bristle brush or broom.

Rinse a small area to test removal process. When it is ready, hose or pressure wash with water. Start at bottom, and work upwards. Do not allow to dry on surface - reapply more product. Use hose with 6" pressure

nozzle or high pressure equipment (up to 190° F and 2000 psi). Be careful of surface damage caused by water pressure. Reapply if needed.

Product requires 15 - 60 minutes to work (up to 24 hours if necessary). Time increases with cool temperature, rough texture and thickness of graffiti. Expect up to 400 sq. ft. / gallon. Rougher surfaces will use more product. Protect adjacent areas if needed.

CAUTION: Irritant. Strong alkaline solution. Harmful if swallowed. Use protective gloves and eye guard. Rinse off any body contact immediately. Keep away from children.
